

East Michigan FAASTeam Safety Seminar

The FAASTeam Safety Topic this month is on emphasizing the dangers of spatial disorientation and optical illusions. NTSB accident data indicates that spatial disorientation may be one of the reasons for the loss of control type of general aviation accidents – particularly at night or in limited visibility weather conditions. Instrument and VFR pilots are subject to spatial disorientation and optical illusions that may cause loss of aircraft control.

Directions: Oakland County Intl Apt Terminal Conference Rm

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAAFTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
